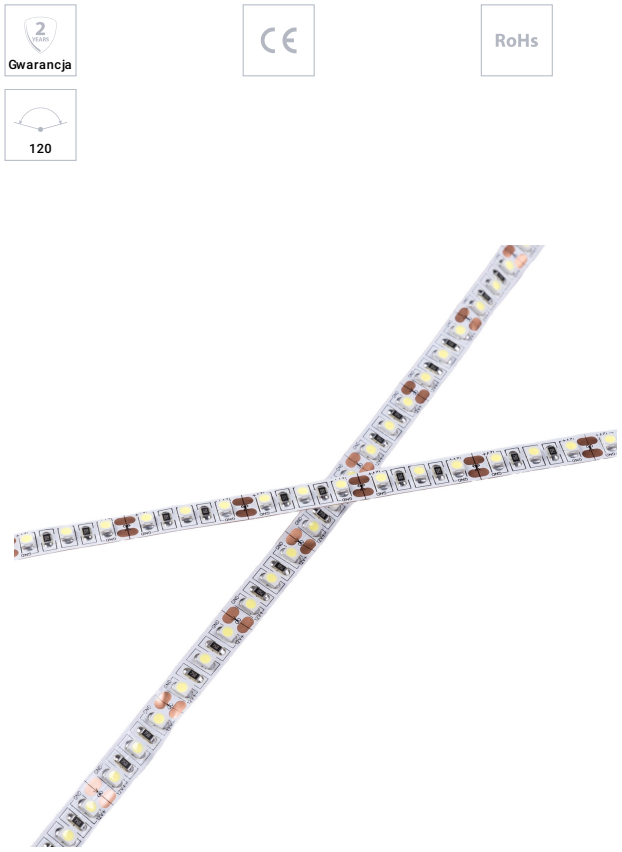
Blaupunkt LED strips

Blaupunkt Pro Line LED strips are an arrangement light source for the decoration of commercial spaces and private apartments. The Blaupunkt LED strip is equipped with as many as 120 LEDs of 2835 SMD type arranged on a meter section and is available in three colors – natural white, warm white and cold white. The LEDs are characterized by a brightness of 980 lumens and a high ambient color rendering index CRI> 80. The advantage of the Blaupunkt LED strip is a rare service life of up to 50,000 hours.



Technical data

	Item code	Colortemperature [K]	Power [W]	Luminosity [lm]	Number of LEDs
