

## 1-phase Greenie rail fittings

1-phase rail fittings are dedicated 1-phase rail system components. The fitting is made of aluminum with a polycarbonate finish. The product does not have a light source and thus it requires a separate source, based on an E27 socket. The ideal solution are compatible light bulbs of PAR series (spot lighting), although, of course it is possible to install in any light source based on an E27 standard.

### Parameter

**TECHNICAL DATA:**

**Housing material:** aluminum

**Housing color :** white or black

### Technical data

	Item code	Dimensions [mm]	Weight
The luminaire 1-phase rail black model 816	RS10C816	100 x 160 x 260	0,66kg
The luminaire 1-phase rail black model 809	RS10C809	60 x 80 x 180	0,31kg
The luminaire 1-phase rail w white model 816	RS10B816	100 x 160 x 260	0,66kg
The luminaire 1-phase rail w white model 809	RS10B809	60 x 80 x 180	0,31kg
