3-phase Greenie rail fitting

3-phase Greenie rail fittings are dedicated 3-phase rail system components. The fitting is made of aluminum with a polycarbonate finish. The product does not have a light source and thus it requires a separate source, based on an E27 socket. The ideal solution are compatible light bulbs of PAR series (spot lighting), although, of course it is possible to install in any light source based on an E27 standard. 3-phase Greenie rail fittings are compatible with all 3-phase rails.

Guarantee | CE | RoHs | 230V | IP40

Parameter

TECHNICAL DATA:	Housing material: aluminum
	Housing color : white or black

Technical data

	Item code	Dimensions [mm]	Weight
Binding rail 3-phase black model 816	RS3OC816	100 x 160 x 260	0,66kg
Binding rail 3-phase black model 809	RS3OC809	60 x 80 x 180	0,31kg
The luminaire 3-phase rail white model 816	RS3OB816	100 x 160 x 260	0,66kg
The luminaire 3-phase rail white model 809	RS3OB809	60 x 80 x 180	0,31kg
