Greenie LED Garage Lamps

Greenie LED Garage Luminaires are luminaires with motion and dusk sensor. They turn on when it is dark and when they detect a movement within their range. Thanks to this feature, they are ideal for places which demand only periodical lighting. Lighting time duration may be adjusted in a range from 10s to 200s. Then the lamp switches off automatically. Frequent switching on and off does not affect the service life of the Garage luminaires.
