

## Greenie LED Plafond

Greenie LED Plafond are surface –mounted replacements of traditional plafonds. They are square luminaires made of plastic. Under the matte covering, there are evenly spaced diodes, allowing plafond to generate light by its entire surface. Besides the standard model that illuminates when it's turned on, we also offer a version with emergency power supply – it is the ideal solution for applications such as stairwells. Thanks to emergency power supply lamp will light for a specified time, even if the building suffers from a power failure.
