

Magnetic lamps

The Blaupunkt magnet lamp is a multifunctional product that combines modern design with the advantages of LED technology. The PIR sensor detects movement from a distance of 3 meters, and the brightness of 100 lumens ensures good illumination of various spaces. The Cordless Blaupunkt magnet rechargeable lamp is a wireless light with a motion sensor, which is perfect as additional lighting in the bedroom (next to the bed), kitchen (as lighting for countertops), office (lighting for cabinets in the desk), wardrobe or staircase. It has a USB port.
